

Delta Industrial Scale Pit Extension for Wieser Recycling

As Weiser Recycling updated their truck scale equipment to better serve their customers, they called on Delta Industrial to expand their existing scale pit to meet the new scale's exact specifications.

Wayne County, MI. - Delta Industrial provided their Complete Industrial Contracting Solutions for Weiser Recycling. The Project included extending an existing truck scale pit per the exact specifications of the new scale. A site meeting with Weiser to fully understand their daily operations was necessary to guarantee the lowest amount of down time and business interruption.

The result was a finished pit, an operational scale and another satisfied customer. The work included all the concrete sawcutting, excavation, concrete, and required reinforcing steel. During every step of the process Delta Industrial stayed within Weiser's budget and timeline.

Joe Luther, General Manager at Weiser Recycling said about the project: "Delta provided us with a great value for how extremely precise, quick and painless the entire process was. We are all extremely pleased with the results and will absolutely hire Delta Industrial for all future projects!" With the addition of this new scale and the seamless installation provided by Delta Industrial Weiser Recycling is now the most technologically advanced scrap metal facility in Wayne County.

Delta offers a variety of professional services with the customer's best interest in mind. These services include such items as machine & press foundations, steel slitting lines, general building maintenance & construction, concrete flatwork and steel design, fabrication & construction. With the diversity of construction knowledge that Delta brings to the jobsite it quite simply **GAURANTEES** success in all facets of the project, regardless of the scope of work.
